REPORT TO PARLIAMENT

Over- and underspending of municipalities as at 30 June 2018

July 2019

PURPOSE:

- 1. To inform Parliament about the over- and underspending on adopted municipal adjustments budget for the 2017/18 financial year;
- 2. To highlight the trends pertaining to the over- and under collection of revenue for the 2017/18 financial year; and
- 3. To provide an update on the budget and financial management reforms and the ongoing support initiatives implemented to address the challenges in local government.

BACKGROUND:

- 4. Prior to 2003, local government finance and accounting systems were characterised by one-year budgeting practices, unsupported integrated and strategic planning not aligning to municipal budget priorities over the medium term. Regular and accurate reporting was lacking, annual reports were not published and annual financial statements were in many instances, either not submitted for audit timeously or not submitted at all.
- 5. The enactment of the Municipal Finance Management Act (MFMA) in 2003 followed by the promulgation of the Municipal Budget and Reporting Regulations (MBRR) in 2009 enabled National Treasury to develop and implement a uniform approach to local government budgeting and reporting systems. The MFMA and MBRR have resulted in a major overhaul of the local government financial system allowing for greater transparency in local government finances.
- 6. The Local Government budget and financial management reform agenda, set by the National Treasury, has strengthened fiscal discipline in the local government sphere and created a foundation for achieving longer term municipal financial sustainability. The reforms focussed on compilation of funded budgets, improving management of the revenue value chain, provision of technical support through financial management capacity building, addressing municipal financial problems through the development of a financial recovery plan, improving business processes through the Municipal Standard Chart of Accounts (mSCOA) and ensuring that processes are in place to deal timeously with issues of financial misconduct.
- 7. Similar to other reforms, there are inevitably practical challenges faced in implementation of local government budget reform. While many municipalities have been successful in tabling and adopting funded budgets aligned to the Integrated Development Plans (IDPs) and Spatial Development Frameworks (SDFs) and improving on in-year reporting, there are those municipalities where challenges still persist for a variety of reasons.

- 8. It is evident that, non-compliance of Section 18 of the MFMA, is still endemic across financially distressed municipalities. These municipalities are not adopting funded budgets as required in terms of Section 18 of the MFMA which stipulates that "an annual budget may only be funded from realistically anticipated revenue to be collected; cash-backed accumulated funds and borrowed funds for only capital projects". This has largely resulted in municipalities facing financial management challenges due to, amongst others, poor budget practices, weak financial management and lack of oversight by municipal council on budget implementations. Adopting a funded budget has become more critical now than before as it has a direct bearing on the financial sustainability of the municipality.
- 9. The misalignment of financial and non-financial information through Section 71 of the MFMA and inadequate monitoring of budget implementation are part contributors to the over- and underspending of municipal budgets. The Section 71 reporting process, if properly implemented, is intended to serve as an early warning system for municipal councils, provincial legislature and other stakeholders in ensuring improvements in municipal performance.
- 10. Despite the efforts made through the implementation of *m*SCOA to improve Section 71 reporting, the accuracy and reliability of municipalities' financial information still remains a challenge. However, the introduction of this *m*SCOA has added additional dimensions to the National Treasury's analysis of municipal Section 71 reporting.
- 11. In the year 2010, National Treasury drafted a discussion paper called "Is local government unfunded" to address financial challenges in municipalities". This discussion paper emphasised that the root cause of local government failures is largely people centred, the fragmentation of institutional arrangements contributed to it (for example, blurred accountabilities between districts and locals); and it continued to dispel the myth that local government problems are entirely due to unfunded budgets by suggesting that the poor budgeting, financial mismanagement, fraud, corruption and lack of political will to put the needs of communities first are at the heart of the municipal financial sustainability and viability challenges. Essentially, weak financial governance is at the heart of local government challenges.
- 12. While the National Treasury and respective Provincial Treasuries continues to monitor the implementation of municipal budgets, assess the financial performance (i.e. actual revenue, expenditure and cash flow) against adopted budgets and ensure compliance with the conditions of the annual Division of Revenue Act (DoRA), it is invariably the role that municipal councillors should play in exercising oversight of their respective municipalities. The legal framework is prescriptive about the roles and responsibilities of councillors but it is evident that there is a lack of consequences or rather a lack of appetite to enforce consequences by municipalities.
- 13. The Technical Committee on Finance (TCF) Lekgotla in 2015 acknowledged that more effort is required to ensure financially sustainability in municipalities. Revenue management, asset management and funded budgets are key "game changers" to address municipal performance failures. Significant progress has been made with regard to the adoption of funded budgets by non-delegated municipalities since the enhancement of the Budget Assessment Methodology and Funding Assessment Tool to provide a consistent and reliable assessment methodology across national and provincial treasuries to determine whether municipal budgets are credible and sustainable in terms of Section 18 of the MFMA.

14. In 2017/18, Mahikeng Local Municipality was the only municipality amongst the 17 non-delegated municipalities to adopt an unfunded budget. Of the 257 delegated municipalities, 83 adopted an unfunded budget. MFMA Circulars No. 74 and 89 issued by the National Treasury emphasised the importance of adopting a funded budget by highlighting that any municipality with an unfunded budget is required to develop a financial plan outlining actions to be undertaken to produce a funded budget.

DISCUSSION:

- 15. This report provides an assessment of the implementation of the 2017/18 adjustments budget by municipalities. In particular, it focuses on areas of over- and underspending and analyses are made on a national and provincial level. Details of municipal revenue and expenditure are attached as **Annexure A, B and C**.
- 16. Levels of overall spending vary with some areas showing an improvement from previous years, however, there is still substantial space for municipalities to improve on implementation of internal budgetary controls to reduce significant variances. Underspending in certain instances can be a measure of fiscal control, particularly, in cases where anticipated revenues do not materialise. Municipalities are forced to cut back on expenses to accommodate shortfalls in revenue. However, tacit knowledge of the environment indicates that underspending in most cases is reflective of poor planning.
- 17. It is observed that unfunded budgets are predominantly prevalent in smaller municipalities who are confronted with capacity challenges, weak governance and high levels of institutional and operational inefficiency. While many of these municipalities may rightly argue that funding is insufficient the adequacy of budget funding is also determined by examining the efficiency of the organisational and operational management arrangements.
- 18. As part of its monitoring and oversight responsibilities, National Treasury releases a quarterly publication on the statement of revenue and expenditure of local government together with information on the performance on conditional grants. This report is part of the in-year management, monitoring and reporting system for local government which enables provincial and national departments to exercise oversight over municipalities and identify possible risks that requires corrective measures. National Treasury is responsible for 17 non-delegated municipalities consisting of eight metropolitan councils, eight secondary cities and one district council, the responsibility to provide oversight and support to the other 240 municipalities is assigned to Provincial Treasuries.
- 19. The financial information presented in this report, is based on the audited financial results for the year ended 30 June 2018. It must be noted that this financial information was audited by the Auditor-General at the time of submission to the local government database. National Treasury is, for the first time, analysing the audited financial results submitted to the Auditor-General different to the preliminary results (Section 71 reporting) used in the past.
- 20. The financial performance of municipalities as at 30 June 2018 relating to the overand under expenditure is consolidated per province and presented below.

Summarised over- and underspending by municipalities as at 30 June 2018

Table 1: Summarised over- and under spending as at 30 June 2018 (Audited Results)

	Main appropriation	Adjusted Budget	Audited Outcome: 30 June 2018	Total Expenditure as % of main	Total Expenditure as % of adjusted	(Over)	Under	Nett
R thousands				appropriation	budget			
Operating Expenditure	346 274 684	347 641 640	346 319 706	100.0%	99.6%	(14 400 554)	15 722 487	1 321 933
Capital Expenditure	70 623 096	71 088 410	60 859 224	86.2%	85.6%	(4 660 988)	14 890 173	10 229 185
Total Expenditure	416 897 780	418 730 049	407 178 931	97.7%	97.2%	(19 061 541)	30 612 660	11 551 119
of which								
Conditional grants Spending	39 485 518	32 483 600	28 639 122	72.5%	88.2%	(513 272)	4 357 750	3 844 478

- 21. As at 30 June 2018, municipalities on aggregate spent 99.6 per cent or R346.3 billion of the total adjusted operating expenditure budget of R347.6 billion, resulting in a net underspending of R1.3 billion. In 2015/16 and 2016/17 net underspending was R29.4 billion and R36.9 billion respectively.
- 22. This substantial variance of net underspending between the 2016/17 and 2017/18 financial years is as a result of the comparison between two dissimilar set of financial results (2016/17's 4th Quarter Section 71 results and 2017/18's audited results). Furthermore, this variation is mainly attributed to reporting gaps by most municipalities on items such as provision for debt impairment, depreciation and asset impairment as well as provision for outstanding creditors during the S71 reporting. These items are usually reported more accurately at year end when financial statements are compiled by municipalities.
- 23. In respect of capital expenditure, municipalities in aggregate spent 85.6 per cent or R60.9 billion of the total adjusted capital budget of R71.1 billion. Net underspending of the capital budget amounted to R10.2 billion when compared to R14.4 billion in 2016/17.
- 24. There was an aggregate net underspending of R3.8 billion or 11.8 per cent of the adjusted budget on conditional grants. Total underspending of conditional grants was R4.4 billion offset by overspending of R513.3 million, resulting to a net balance of R3.8 billion which is a slight regression when compared to R3.7 billion in 2016/17.
- 25. It was observed that in spite of declining revenue collection levels, unachievable revenue estimates and increasing debtors, municipalities continue to spend or make commitments against these exaggerated revenue projections. Failure to contain costs within the lower revenue collection levels mean that financial challenges are unavoidable. Municipalities in Limpopo, Northern Cape, Free State and North West persistently incur significant budget variances on their operating and capital budgets. Among the issues contributing to these material differences are as follows:
 - 25.1 Adoption of unrealistic budgets municipalities continues to adopt budgets that are either unfunded or inadequately funded from a cash flow position. This places pressure on the finances of these municipalities;
 - 25.2 Ineffective budget planning and implementation inability to maximise the capital budget spending while overspending on the operating budget, increasing non-priority spending and persistent negative cash balances;

- 25.3 Unrealistic budgeted revenue collection levels are not realised while operating costs (such as employee related costs) remain high with no effort made to contain expenditure;
- 25.4 Increases during adjustments budget period although National Treasury has on several occasions advised municipalities not to increase their capital budgets at mid-year to avoid underspending, most municipalities adjusted their capital budgets and still underspent at year end;
- 25.5 *Multi-year budgeting* municipalities tend to focus their budgets only on one-year perspective; regardless of the fact that the budgeting framework for local government provides for multi-year allocations as appropriated through Division of Revenue Act (DoRA);
- 25.6 Weaknesses in supply chain management projects are mostly delayed by poor planning, appointment of incompetent service providers and high occurrence of variation orders, costs overrun and litigation by unsuccessful applicants. A recent development is the interruption of awarding of tenders by local communities as they insist that 30 per cent subcontracting condition (as stipulated in the preferential procurement regulations) be set aside for local beneficiation and participation. In addition, some community members demand that contractors with provincial and local governments pay 30 per cent of their contracts in cash in lieu of being subcontracted with 30 per cent of the value of the contract; and
- 25.7 Unfunded mandates municipalities are budgeting for unfunded or underfunded mandates. Unfunded mandates occur when a municipality performs a function on behalf of other spheres of government and bears significant costs as a result e.g. providing library and primary health services on behalf of provincial departments.

Expenditure Performance: Total Budget

26. Table 2 below shows the over- and underspending of total expenditure, aggregated per province, as at 30 June 2018.

			•		Net	11 55	1 119		

- 27. The aggregated net underspending as at 30 June 2018 was R11.6 billion comprised of total underspending of R25.8 billion and overspending of R14.3 billion. This represents an improvement from the 2016/17 financial year where net aggregate underspending was R51.3 billion¹.
- 28. Municipalities in Western Cape reported the highest increase of their adopted budgets during the adjustments budget process, from original budget of R66.1 billion to adjusted budget of R66.8 billion, followed by Limpopo with an increase of R654.9 million (from original budget of R22.1 billion to adjusted budget of R22.7 billion). Other six provinces (Free State, Kwazulu-Natal, North West, Mpumalanga, North West and Eastern Cape) slightly increased their budgets while municipalities in Gauteng reduced their adopted budgets by R1.7 billion (from original budget of R144.9 billion to adjusted budget of R143.2 billion) during the adjustments budget process. The total budget increase from original to adjusted budget for all provinces averaged to R1.8 billion. Most municipalities revised their budgets upward, to either accommodate additional revenue from conditional grants that became available during the year or to cover unplanned expenditure by overstating revenue.
- 29. Municipalities in Free State and Northern Cape slightly increased their adopted budgets. The necessity to effect smaller changes to the adopted budgets could be indicative of improved financial planning and institutionalisation of budget reforms such as municipal standard charts of accounts (*m*SCOA), which assisted municipalities to improve on budget practices.
- 30. Municipalities in Kwazulu-Natal and Gauteng continue to perform satisfactorily in respect of total spending on their adjusted budgets relative to other provinces. Overand underspending fell within the acceptable margin of 5 per cent for over- and underspending.
- 31. Historically, the Free State, Limpopo and North West provinces have persistently reported underspending of their adjusted budgets. This was a cause for concern since these provinces are predominantly rural with significant service delivery backlogs. However, North West have improved in 2017/18 by achieving over- or underspending within the acceptable margin of 5 per cent.
- 32. In the Limpopo province, municipalities overspent on their adjusted budgets by 24.2 per cent. Overspending is a serious concern as most of the budgets prepared by municipalities in this province were unfunded, unsustainable and presented over ambitious revenue projections.
- 33. Most municipalities in North West, Northern Cape, Limpopo and Free State Province are not financially self-sustainable and are heavily reliant on intergovernmental transfers. It is recognised that, because of the economic inequalities across provinces, certain municipalities have limited own revenue generation opportunities. Intergovernmental transfers are therefore integral to subsidise the poor households and address service delivery backlogs as an effort to ensure that municipalities fulfil their basic service delivery mandates.
- 34. Table 3 below shows the number of municipalities that have over- or underspent against their total adjustments budgets as at 30 June 2018.

¹ The substantial variance is due to the comparative analysis of financial results between two dissimilar set of financial data. This report is based on the audited results while the previous report was based on the Section 71 preliminary figures.

Total	39	14	24	31	42	40	26	41	0

- a. 73 municipalities performed within a 5 per cent margin (below or above) their adjustments budget relative to 25 municipalities in previous year. Performance within a 5 per cent margin is regarded as an acceptable variance for operating expenditure. Improvements in spending could be indicative of improved fiscal discipline in municipalities;
- b. 77 municipalities overspent their budget allocations by more than 5 per cent. 39 of these municipalities overspent their adjusted budgets by more than 15 per cent. This indicates that there are a number of municipalities who still lack fiscal discipline and who require further capacity to implement the budget reforms; and
- c. The total number of municipalities that underspent on their total adjustments budget by more than 5 per cent has decreased from 219 in 2016/17 to 107 in 2017/18. Of these 107 municipalities, 40 underspent between 5 and 10 per cent, 26 underspent between 10 and 15 per cent, while 41 underspent by more than 15 per cent.
- 35. It is critical to note that municipalities that have underspent do not necessarily have 'cash in the bank' equivalent to the level of underspending reported. It is therefore incorrect to assume that underspending is indicative of an accumulation of 'cash in the bank' by municipalities. Often underspending is as the result of either inflated revenue projections or liquidity problems resulting from the adoption of non-credible, unsustainable and unfunded budgets. This is evident in the large number of municipalities that are failing to pay Eskom, Water boards and other trade creditors.

Expenditure Performance: Operating Budget

36. Table 4 below shows the over- and underspending of operating expenditure as at 30 June 2018 per province. The net underspending against the 2017/18 adjusted operating budgets was R1.3 billion.

Table 4: Over- and under spending of operating expenditure as at 30 June 2018 (Audited Results)

			•		Net	1 32	1 933		

- 37. Gauteng had the highest adjusted operating budget, estimated at R124.2 billion in 2017/18 followed by Kwazulu-Natal with an estimated budget of R59.7 billion. Both these provinces have performed well against their adjusted budgets compared to the previous financial year. The net underspending of adjusted operating budget has decreased from R36.9 billion in 2016/17² to R1.3 billion in 2017/18, which is made up of overspending of R14.4 billion and underspending of R15.7 billion.
- 38. It is disconcerting to observe that some municipalities are still continuing to spend beyond their budget parameters. This threatens the financial sustainability of municipalities and places municipalities at the risk of a cash flow crisis.
- 39. Signs of financial strain amongst municipalities grew after the 2008 financial crisis and have further intensified recently. There are in some cases systemic issues underlying budgeting challenges in municipalities, which are beyond the control of municipal council. These include for instance, the duplication of structures and functions between spheres of government and between districts and local municipalities, either misaligned or inappropriate devolution of functions, municipalities performing functions which are not within their core competency (unfunded mandates) and to a lesser extent the impact of amalgamations.
- 40. In addition, the overspending of budget allocations may be attributed to weaknesses in internal controls resulting in unauthorised expenditure. Municipalities must develop workable strategies to maximise revenue and reduce non-essential expenditure. This can only be achieved with the implementation of austerity measures, reducing operational inefficiencies and ensuring value for money for every Rand spent.
- 41. Table 5 below shows the number of municipalities that overspent or underspent their 2017/18 adjusted operating budget. Over- or underspending within 5 per cent variance of the budget is regarded as acceptable in respect of operating budgets.

² The substantial variance is due to the comparative analysis of financial results between two dissimilar set of financial data. This report is based on the audited results while the previous report was based on the Section 71 preliminary figures.

Table 5: Analysis of the over- and under spending of operating budget as at 30 June 2018 (Audited Results)

Total	56	23	24	38	34	40	19	23	0

- a. A total of 72 municipalities have attained spending levels within the 5 per cent variation for over- or underspending. This is an improvement from the 21 municipalities reported in 2016/17 under this category. This reinforces the conclusion that municipalities in general are becoming more adept in the implementation of the budget;
- 82 municipalities underspent on their adjusted operating budgets for 2017/18.
 Of these 82 municipalities, 23 have reported underspending of more than 15 per cent;
- A total of 56 municipalities overspent on the adjusted operating budgets by more than 15 per cent. This is a significant increase compared to 7 municipalities reported in this category in the 2016/17 financial year; and
- d. It is evident that while some municipalities have made good progress in implementing the 2017/18 adjusted budget by ensuring that expenditure remains within acceptable variation parameters, others municipalities continues to perform unsatisfactorily.

Expenditure Performance: Capital Budget

42. Table 6 below shows that municipalities spent a total of R60.9 billion or 85.6 per cent of the total adjusted capital budget of R71.1 billion. The net underspending against the 2017/18 adjusted capital budget was R10.2 billion, which is an improvement compared to the net underspending of R14.4 billion in the 2016/17 financial year. This indicates that some municipalities are becoming more skilled in the implementation of capital budgets.

- 43. The main contributors to the underspending on the capital budgets as at 30 June 2018 were municipalities in Northern Cape (31.3 per cent), Free State (28.4 per cent) and Western Cape (24.7 per cent).
- 44. Although improvements have been noted in 2017/18 on the overall spending of the capital budget, underspending of capital budgets persists and can in general be attributed to the following factors:
 - a. Poor project and contract management poor oversight by municipalities in relation to project implementation, especially multi-year infrastructure projects. In the event where the project implementation is behind the scheduled project timeline, municipalities are not taking corrective action timeously. There is lack of contract management, as evidenced by the inability to implement punitive measures against recurrent underperformers and no termination of nonperforming contractors;
 - b. Failure to apply for roll over of unspent conditional grants poor cash flow management and submission of insufficient supporting documents for roll-over applications to the National Treasury (unspent conditional grants by end of the financial year) results in rejection of applications and this negatively impacts capital programmes of municipalities;
 - c. Interference with supply chain management (SCM) political principals interfering with the SCM systems of their municipalities and tampering with SCM documents (tenders, contracts or bids submitted by prospective service providers) hinders the delivery of capital projects. In addition, council's decisions to abruptly suspend senior managers (heads of divisions) interrupts the implementation of key infrastructure projects;
 - Social unrest construction of infrastructure projects being halted due to communities demanding that locals be hired. High unemployment had created a desperate situation in which many jobless people are demanding jobs from on-site contractors; and
 - e. Abuse of the subcontracting regulations the preferential procurement regulations stipulate that 30 per cent of public procurement contracts be subcontracted to designated groups. It is alleged that some community members are now demanding that instead they be paid 30 per cent of the value

of each contract awarded in municipalities. If their demands are not met, they threaten contractors, interrupt or stop the implementation of projects.

- 45. It should be noted that municipalities keep a portion of capital budget allocations as a retention until a capital project has been completed in order to ensure there are no defects and projects are fully completed as per their specifications. National Treasury has observed that often project implementation is accelerated in the last quarter of the financial year to avoid the rollover of unspent grants.
- 46. Table 7 below shows the number of municipalities per province that have over-, or underspent on their adjusted capital budgets. It should be noted that spending within a 10 per cent variance of the budget is regarded as acceptable in respect of capital budgets, considering the various factors such as reduction in the national fiscus, social unrest impacting on the performance of the capital budget.

Western Cape	2	1	0	0	2	6	5	14	0
Total	34	9	4	2	9	26	21	152	0

- 47. The following observation are made on table 7 above:
 - a. A total of 41 municipalities were within the acceptable variation of 10 per cent over- or underspending on their adjusted capital budgets. This is an improvement when compared to the 32 municipalities in this category in the 2016/17 financial year:
 - b. 21 municipalities achieved underspending on their adjusted capital budgets in the region of 10 per cent and 15 per cent. This is an improvement in this category relative to 26 in the 2016/17 financial year;
 - c. Of concern is that 152 municipalities underspent their capital budget by more than 15 per cent. However, this is an improvement compared to the 174 municipalities that fell in this category in 2016/17. It is evident that there are a number of municipalities who are starting to effectively implement their planned capital programmes; and
 - d. 34 municipalities overspent their capital budgets by more than 15 per cent. This reinforces the finding that capital implementation in many instances is poorly planned for and proper budgeting practices must be strengthened.

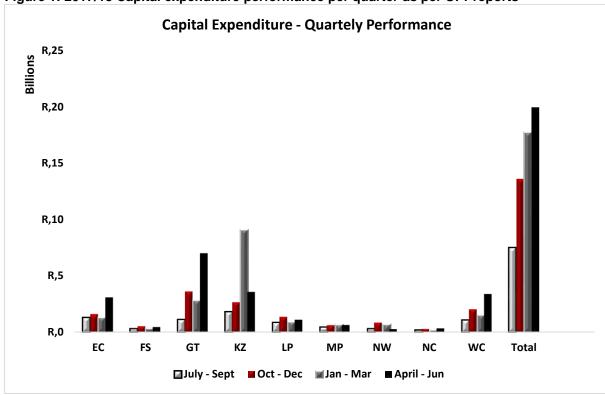

Figure 1: 2017/18 Capital expenditure performance per quarter as per S71 reports

- 48. From the table above, it is evident that many municipalities accelerate implementation of capital projects in the last quarter of the financial year to avoid the rollover of unspent grants and this contributes to poor planning.
- 49. Another contributor to this poor practice is the tendency of paying bulk of the money to contractors in the last quarter of the financial year to manage cash available which serves as an incentive for contractors not to abandon projects prior to its completion.
- 50. Most municipalities in North West and Limpopo have spent at least above 35 per cent of their capital budget at mid-year and their reported expenditure in second quarter is slightly higher than the last quarter while other provinces spent below 35 per cent at mid-year.
- 51. Capital spending levels of below 45 per cent at mid-year (between October and December) is more likely to result in underspending of the adjusted capital budget by end of the financial year. The high level of underspending is prevalent in municipalities that are dysfunctional and financial distressed. These municipalities often utilise funds that are meant for capital projects towards operational purposes.

Expenditure Performance: Conditional Grants

52. Table 8 below shows the total spending on conditional grants was 89.5 per cent of the transferred amount which is slightly above the 87.6 per cent reported in the previous financial year. The net underspending on conditional grants in 2017/18 was R3.4 billion which is lower than that of the previous financial year.

Source: National Treasury Local Government Database

- 53. According to the Division of Revenue Act, 2017 (Act No.3 of 2017), municipalities were allocated R32.5 billion in conditional transfers for the 2017/18 financial year as depicted in table 8 above. As at 30 June 2018, the departments administering conditional grants transferred a total amount of R32.0 billion across 257 municipalities.
- 54. Municipalities reported a total expenditure of R28.6 billion representing 89.5 per cent of the direct transfers of R32.0 billion. Certain municipalities reported overspending totaling R552.1 million while others reported underspending of R3.9 billion which cumulatively resulted in the net underspending of R3.4 billion.
- 55. A total amount of R904.2 million was rolled over to the 2018/19 financial year, the bulk of which was for the Municipal Infrastructure Grant (MIG) and Water Services Infrastructure Grant (WSIG).
- 56. The poor spending on the Municipal Infrastructure Grant is concerning as this grant is intended to address backlogs in bulk infrastructure. Continued unsatisfactory spending on conditional grants may result in funds being stopped or withheld further hindering the delivery of basic services.

- 57. In relation to Table 9 above, the following observations can be made:
 - a. 88 municipalities were able to achieve spending within the 5 per cent variance of over- and underspending;

- b. 81 municipalities underspent on their conditional grant transfers by more than 10 per cent compared to 109 in 2016/17. Of this total, 68 municipalities underspent in 2017/18 by more than 15 per cent; this is an improvement compared to 87 in 2016/17; and
- A total of 24 municipalities overspent their conditional grant transfers by more than 10 per cent. 18 of these municipalities overspent by more than 15 per cent.
- 58. Table 10 below shows the over- or underspending on transfers allocations for 2017/18 per grant.

Total	32 483 600					3 375 752		10.5%

- 59. Total spending by municipalities amounted to R28.6 billion or 89.5 per cent of the total transferred conditional grants allocations of R32.0 billion. There was net aggregate underspending of R3.4 billion or 10.5 per cent as at 30 June 2018.
- 60. The following grants were overspent as at 30 June 2018: Municipal Water Infrastructure Grant (R14.6 million), Integrated City Development Grant (R232.0 million) and Expanded Public Works Programme grant (R15.3 million).
- 61. Poor spending against conditional grant allocations is generally attributed to weakness in project planning and expenditure management. Where municipalities overspend on conditional grant allocations, municipalities are required to fund such over expenditure

from internally generated revenues. National Government does not compensate municipalities that overspend conditional grants.

Revenue Performance

Over- and Under Billing of Revenue

- 62. Table 11 below shows that the total aggregate revenue was R391.8 billion against the adjusted revenue budget of R411.5 billion, represented by 95.2 per cent. This is an improvement when compared to the 91.2 per cent reported for the financial year 2016/17.
- 63. The total aggregated underperformance in respect of billing amounted to R25.0 billion, whereas the aggregate over performance in respect of billing was R5.4 billion. This resulted in a net under performance of R19.6 billion as at 30 June 2018.

- 64. In aggregate, municipalities in the Free State, Gauteng and Kwazulu-Natal reduced their total revenue budgets during the 2017/18 adjustments budget process.
- 65. Municipalities in the Eastern Cape, Limpopo, Mpumalanga, North West, Northern Cape and Western Cape marginally increased their adopted revenue budgets during the 2017/18 adjustments budget process. It is observed that most municipalities in North West, Northern Cape, Limpopo and Free State inflate their revenue projections during the adjustments budget process to produce funded budgets. Three of these provinces have performed unsatisfactorily against their adjusted budget, especially Free State and Northern Cape with 82.0 per cent and 85.3 per cent respectively.
- 66. Table 12 below shows the number of municipalities that have over- or underperformed on their total adjusted revenue budgets for the 2017/18 financial year. It should be noted that over or underperformance in respect of billed revenue within 5 per cent of budget is regarded as acceptable.

- a. A total of 93 municipalities achieved their target in respect of the billing, having over or under billing within 5 per cent range of their adjusted total budgets;
- 32 municipalities have exceeded their adjusted budget by more than 5 per cent while 132 municipalities underperformed on revenue budget by more than 5 per cent;
- c. Of the 132 municipalities that failed to achieve their billing targets, 54 underperformed in the region of 5 and 10 per cent of their adjustments budget when compared to 43 in 2016/17 and 29 underperformed in the region 10 and 15 per cent; and
- d. There is a significant decline in the number of municipalities that underperformed on their adjustments revenue budget by more than 15 per cent, from 94 in 2016/17 to 49 reported in 2017/18.

68. The aggregated operating revenue budget was R342.5 billion and reduced to R340.4 billion during the 2017/18 adjustments budget. The Eastern Cape, Free State, Kwazulu-Natal, Gauteng, Mpumalanga and Western Cape provinces reduced their operating revenue budget during the adjustments budget process. This can be

- attributed to under collection of billed revenue during the first six months of the financial year.
- 69. The table shows an aggregated underperformance of R14.5 billion and over performance of operating revenue of R5.1 billion. This resulted in a net underperformance of operating revenue of R9.4 billion as at 30 June 2018. Most municipalities in North West, Limpopo, and Northern Cape provinces increased their operating revenue budget through the adjustments budget process to reflect funded budgets with surpluses. These municipalities also reported substantial levels of underperformance against their 2017/18 adjusted operating revenue budgets.
- 70. Table 14 below shows the number of municipalities that over- or under performance on their adjusted revenue budgets for 2017/18:

- a. 121 municipalities reached their targets by achieving a target within a 5 per cent variance of the adjusted revenue budget. This is an improvement compared to the 74 municipalities reported in this category at the end of the 2016/17 financial year;
- b. 46 municipalities exceeded their operating revenue budget by billing more than their revenue projections. Certain municipalities in eight provinces (Eastern Cape, Free State, Gauteng, Kwazulu-Natal, Limpopo, Mpumalanga, North West and Northern Cape) performed exceptionally well by exceeding their operating revenue budget by more than 15 per cent. However, some of these municipalities received additional revenue on items such as rentals of facilities and interest on outstanding debtors; and
- c. 90 municipalities underperformed against their operating revenue budget. Of this total, 30 municipalities underperformed by more than 15 per cent of their adjusted operating revenue budgets while 21 underperformed in the region between 10 per cent and 15 per cent when compared to 35 in 2016/17.
- 71. Amongst the factors that contributes to revenue management inefficiencies in municipalities, the most common are:
 - Over-ambitious revenue estimates there is a tendency for municipal councils
 to inflate revenue projections to produce a surplus budget. In most cases,
 these revenue estimates are inconsistent with the economic realities prevailing
 in these municipalities;

- Weak management of the overall revenue value chain including the setting
 of tariffs for trading services and administering the property transfer process;
- Poor implementation of debt collection and credit control policies –
 municipalities have adopted stringent measures over their debtors but it is in
 the implementation of those policies that most municipalities consistently fail.
 As a result, outstanding consumer debtors are escalating at an alarming rate;
- Illegal electricity connections municipalities are losing significant amounts of revenue through electricity theft and tampering of electricity meters;
- Distribution losses due to ageing infrastructure many municipalities are experiencing losses in water and electricity due to the age and condition of infrastructure assets. These municipalities persistently under budget for the repairs and maintenance and renewal of existing infrastructure; and
- Weaknesses in the implementation of indigent policies municipalities are not paying adequate attention to properly profiling indigent households. This has resulted in the provision of free basic services to beneficiaries that are not entitled to benefit. A further contributory factor to poor municipal revenues is provision of free basic services in excess of the National Government Policy guidelines, namely, 6 kl or water and 50kw/h of electricity per households per month.

Under collection of revenue versus the Debtors' Book

72. As shown in Table 15 below, total debtors as at 30 June 2018 amounted to R152.7 billion.

- 73. The debtors' age analysis by province shows that Gauteng province (with three metros) has the highest outstanding debtors of R49.1 billion while the Northern Cape has the lowest at R3.8 billion.
- 74. The failure on the part of municipalities to collect revenue due and the inadequate debt impairment provisions are among the factors contributing to cash flow shortages. This must be remedied to achieve financial sustainability. While several municipalities have appointed debt collectors to assist in the collection of arrear debt, the effectiveness of such intervention is determined largely by the will of the municipality to enforce credit control and debt collection policies.
- 75. Failure to adequately implement an effective billing and financial system that ensures consumers are correctly billed for services consumed is another factor that negatively impacts the growing municipal debtors.
- 76. The under collection of billed revenue has a direct bearing on the cash position of municipalities considering that expenditure projections are based on the level of billed revenue instead of revenue collection. Outstanding debt has decreased from R128.3 billion in 2016/17 to R126.2 billion in 2017/18.
- 77. It should also be noted that the following has an impact on the collection of revenue:
 - The economic slowdown contributing to increase in job losses which is more acute in mining towns impacts negatively on the ability of households to pay for municipal services;

- b. Significant increases (usually higher than inflation) in the prices of basic municipal services makes tariff increases unaffordable and increases the levels of non-payment for services; and
- c. Traditionally, electricity has been the highest revenue generator for municipalities. However, the increase in the number of households and businesses opting for alternative sources of energy such as solar panels and gas is negatively impacting the generation of electricity revenue.

Operational failures on the part of municipalities tabling unfunded budgets

- 78. It is necessary to acknowledge the magnitude and consequences of operational failures at municipalities to better understand why the attempts to resolve the issues of unfunded budgets have not yielded positive and sustainable results.
- 79. While significant strides have been made in ensuring that local government is adequately funded through the revision of the Local Government Equitable Share formula, there are other challenges that require immediate attention.
- 80. When National Treasury assessed the budgets of municipalities that persistently adopt unfunded budgets, the following issues were evident:
 - Poor financial management capabilities negatively impacting on the revenue collection rate and consequently the debtors book continue to accumulate hence most municipalities mainly depend on the equitable share and government grants to sustain their operations;
 - Deficiencies in the billing transaction processing which impacts negatively on the integrity of billing information and revenue collection. Recent Section 71 and 72 reports from respective provinces or municipalities indicate the discontent with the municipalities' poor billing practices. In addition, faulty meter readings and incorrect consumer information are among the contributing factors to the poor billing. Although most municipalities have developed revenue strategies to improve their debt collection and enforce credit control policies, these strategies are poorly implemented resulting in no real tangible improvements;
 - Weak municipal leadership, including ineffective councils and governance structures contribute to weak fiscal discipline and consequently financial mismanagement. Governance failures which lead to the overall failure of the institution, particularly where there was a hostile relationship between the regional political branch and the Mayors of respective municipalities;
 - Institutional instability because of political interference in the administration, weak political oversight and monitoring of budget implementation with no consequences for poor audit outcomes;
 - The absence of a suitably competent Chief Financial Officer presents a risk to sound financial management as it provides opportunities for the flouting of internal controls, non-compliance to the legal framework and general mismanagement of public funds;
 - Undefined roles and responsibilities resulting from a lack of clarity of the institutional arrangements between districts and local municipalities. In the

case of water services, the institutional relationship between the Ngaka Modiri Molema District and Mafikeng Local Municipality is a typical example of where the unclear institutional arrangements and absence of a service level agreement for the provisioning of water services is at the root of disputes with respect to the allocation of the Equitable Share. This is directly linked to the lack of understanding by the district and local municipality on the powers and functions legally assigned to them; and

 Failure to pay creditors within the MFMA's prescribed thirty days or as contractually stipulated. The increasing outstanding creditor's amounts for the past three financial years demonstrated that several municipalities are not prioritising the payments to creditors, particularly the payments to bulk suppliers (Eskom and Water boards). This increasing debts has a direct impact on the funding compliance of municipalities.

National Treasury's responses to improve municipal performance

- 81. In order to address the budgeting challenges in municipalities it is imperative that the broader scope of remedial action required is recognised and that all spheres of government contribute to the recovery process. Therefore, a multi-pronged approach that includes addressing operational inefficiencies, incompetence and governance failures is required to ensure sound fiscal discipline in the longer term.
- 82. In 2017, the Budget Council Lekgotla agreed that there is a need for PTs to report quarterly on the progress with regard to the implementation of the province specific strategies and progress made against each of the identified game changers (funded budgets, revenue management, supply chain management, asset management, mSCOA and audit outcomes).
- 83. The Budget Council Lekgotla acknowledged that concerted effort is required to support municipalities with the implementation of budget reforms with specific focus on funded and credible budgets. Therefore, it was decided that municipalities adopting unfunded budgets must redo their budgets until they are funded or develop financial plans that will address budget shortfalls or deficits.

Funded municipal budgets

- 84. Recent annual MFMA Budget Circulars No. 74 and 89, highlights the importance of tabling funded budgets. As one of the key game changers, national and provincial treasuries are conducting comprehensive analysis on tabled budgets of municipalities to identify possible risks and provide guidance to municipalities on how to address challenges.
- 85. In additional to the annual budget circulars, National Treasury enhanced the Budget Assessment Methodology and Funding Assessment Tool to provide a consistent and reliable assessment methodology across national and provincial treasuries to determine whether municipal budgets are credible and sustainable in terms of Section 18 of the MFMA.
- 86. Municipalities that are failing to produce funded budgets in a particular financial year will be required to submit a plan of action on how to improve from unfunded to a funded position.

87. The graph below shows that municipalities adopting funded budgets have increased from 157 in 2016/17 to 165 in 2017/18 and reduced to 134 in 2018/19. It is evident that municipalities are starting to acknowledge the importance of adopting funded budgets.

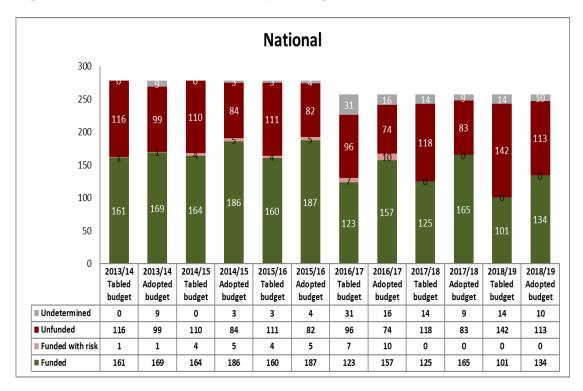

Figure 2: Funded / Unfunded Municipal Budgets

The Municipal Financial Sustainability Challenges

- 88. In 2017, National Treasury drafted a discussion paper "The Municipality Financial Sustainability Challenges". This followed a discussion at the Budget Lekgotla to find ways to address the municipal financial sustainability challenges. The discussion paper emphasised the root causes of operational failures on the part of municipalities that are defaulting on bulk supply creditors and collective responses to those challenges.
- 89. The Budget Council endorsed that a holistic approach to improving financial management and sustainability should be implemented by Government (Department of Cooperative Government, National Treasury, the South African Local Government Association and all appropriate role players in the space of Local Government).
- 90. It was acknowledged that provincial interventions implemented in the past financial years in terms of section 139 of the Constitution to assist struggling municipalities have not necessarily yielded the desired outcomes.
- 91. Achieving financial sustainability in municipalities goes beyond adopting a funded or credible budget. When National Treasury assess municipal budgets of municipalities it also determines to what extent does those budgets gives effect to long-term financial and operational sustainability of municipalities.

92. On the other hand, the Financial Recovery Services Unit assist municipalities placed under intervention with preparations of financial recovery plans. Currently, 16 municipalities are implementing financial recovery plans, some of these municipalities are not under interventions, but have requested assistance from the National Treasury. Municipalities that are receiving support are Mangaung, City of Tshwane Metro, Msunduzi, City of Mbombela, Maluti-A-Phofung, Masilonyana, Mafube, Ubuntu, Kai Garib, Edumbe, Harry Gwala, Dipaleseng, Naledi, Emfuleni and Emalahleni.

mSCOA

- 93. Prior to the introduction of *m*SCOA, municipalities used to submit their annual budgets and in-year performance reporting to the National Treasury's Local Government Database (LG Database) using standardised Excel reporting formats, but the accuracy, reliability and relevance of the consolidated information was questionable. The introduction of *m*SCOA has significantly improved the ability of National Treasury to ensure that municipalities report in a uniform, consistent and reliable way, as the correctness and accuracy of the submissions can now be validated. The reliability and relevance of reported performance can be verified because all municipalities are using the standard classification that are defined in simple terms, which ensures transactions are appropriately classified.
- 94. The *m*SCOA Regulations requires that municipalities upload their annual MTREF budgets (tabled and adopted) as well as monthly actuals in a data string format to the Local Government Database and Reporting System across the six *m*SCOA regulated segments. The successful submission of the budget data strings once again exceeded expectations as 92 per cent of municipalities had successfully uploaded their tabled 2017/18 MTREF budget data strings (TABB) on 26 July 2018.
- 95. However, there are still inconsistencies between the *m*SCOA data set and the approved budgets or monthly actuals schedules submitted by some municipalities. When National Treasury investigate into the reasons for this unreliable data, it was revealed that some municipalities do not generate the reporting schedules directly from the financial system but still prepare these schedules manually on excel spreadsheet, hence discrepancies between the *m*SCOA data set and the approved Schedule A, B or C.
- 96. In Phase 4 of the *m*SCOA project implementation, a once off non-accredited *m*SCOA training was rolled out to approximately 5 821 officials from all three spheres of government and other relevant stakeholders across the affected environment. However, due to the high turnover of staff in government, especially in municipalities, there is a need for continuous and accredited training on *m*SCOA.
- 97. The National and Provincial treasuries are key stakeholders that drive the successful implementation of the *m*SCOA reform in municipalities. To date, intensive efforts have been made to build the capacity of the Provincial and National Treasuries through monthly progress meetings and training sessions.
- 98. National Treasury has also continued to meet quarterly with the Reporting Reference Group to discuss and agree on *m*SCOA related reporting issues. The reference group consists of representatives from National and Provincial Treasuries, all municipal system vendors, municipalities that act as their own vendors (Cities of Cape Town, eThekwini and Johannesburg), the Accounting Standards Board (ASB) and Chartered Institute of Government Finance Audit and Risk Officers (CIGFARO). These meetings

- have also eliminated the duplication of efforts when National and Provincial Treasuries meet with system vendors separately on the same issues.
- 99. All 257 municipalities should now be able to transact and report in *m*SCOA and that planning and reporting integrate seamlessly across the accountability cycle.

CONCLUSION:

- 100. The over- and underspending report systematically discusses the revenue and spending performance of all 257 municipalities per province. This report highlights that a **significant number of municipalities continue to perform unsatisfactorily** in terms of their budget planning, implementation and monitoring.
- 101. In aggregate, the 2017/18 total underspending of the capital budget has shown marginal decrease compared to the previous financial year (2016/17) and this indicates that municipalities are still struggling with implementation of capital programmes. Until municipalities adopt a more serious approach to project management, contract management and supply chain issues, underspending of the capital budget will be a permanent feature of the local government landscape undermining development efforts.
- 102. **Several municipalities continue to adopt unfunded budgets** in spite of being cautioned against this practice. This demonstrate financial problems and governance issues in those municipalities. National and provincial treasuries have taken a step to influence these municipalities to develop financial plans that will outline actions to be undertaken to develop funded budgets.
- 103. A widespread problem is the **weak governance and administrative challenges** which culminated in the suspension of many municipal managers and chief financial officers. These suspensions weaken the administrative capacity and accountability within the municipality.
- 104. **Overstating of operational revenue budget** on the basis of unrealistic budget assumptions remains a challenge. This provides municipal councils with a false sense of self-sufficiency with regard to revenue generation. The practice of artificially inflating revenues is the nexus of many financial failures in local government.
- 105. Escalating debt levels continue to be a problem in local government. Although municipalities provide various reasons for under-collection of revenue, it is acknowledged that poor fiscal effort underlies the dismal performance in this area. Weak implementation of credit controls perpetuates a culture of non-payment and the failure to appropriately manage indigent accounts further exacerbates the problem of increasing debt levels.
- 106. It is broadly acknowledged that the key game changers required to address municipal financial performance failures are funded budgets, revenue management, *m*SCOA, asset management, Supply Chain Management and audit outcomes. National Treasury is working jointly with provincial treasuries to implement other initiatives to assist municipalities to address weaknesses in specific financial management discipline including budgets and revenue management. This will include engaging with other stakeholders such as Department of Cooperative Governance (DCoG) to address matters of governance, service delivery, institutional and human resources challenges that are eminent in municipalities.

Annexure A

Over- and under billing of total revenue for 2017/18
